The power of speech – easy, mobile and secure

At Olympus, we know how to make the most delicate of technology durable, mobile and reliable. And we understand the demands of professionals who need to use equipment in different environments and stressful situations and to easily integrate it in digital workflows. We have therefore combined our many years' experience in making professional high-tech equipment with our vast expertise in the field of digital recording, to develop the new DS-range.

While the previous ranges have excelled at making digital dictation reliable and easy to use, this new generation steps up to give you the perfect tools for fully integrated workflows. They are easily manageable and secure – and so mobile, you have the whole solution right in your pocket, whatever the challenges of the job.

Speech to Text

Easy-to-use design
Set-up, recording and editing is easier than ever on the new DS recorders. The DS-7000's slide switch makes dictation more comfortable than ever, dictation tags help simplify speech processing and the large colour LCD has been designed to be read in a blink of an eye.

Full flexibility
With their vast array of functions and accessories, audio codecs, up to 20 worktypes, long-lasting batteries and much more, the new DS devices can be customised to suit any purpose in any IT environment. Every feature is easily configurable with a separate software application.

Superior quality
Olympus' reputation for quality and reliability over 40 years speaks for itself – so no matter how hard you work, you can rest assured that your equipment can keep pace all the way.

Data security
Security is a key concern in any business. The new DS recorders can be secured with a 4-digit PIN and real-time 256-bit encryption while dictating, to give you full control over who knows what at any given moment.

Product Portfolio

DS-3500

DS-7000

DS-3500
- Easy operation via pushbuttons
- Full integration into professional workflows
- Perfect for recording conferences and interviews in stereo (with external microphones[1])

DS-7000
- Precision slide switch for full control in your palm
- Speech-optimised microphone
- Full integration into professional workflows
- Up to 200 customised selectable dictation tags
